### **ARCAD Software Names New Reseller for Germany and Austria**

*Reseller EMYDIS announces successful sale of ARCAD products to rotary engine manufacturer Aerzener Maschinenfabrik.*

ANNECY, FRANCE, and PETERBOROUGH, NH – May 7, 2008 – ARCAD Software, developer of solutions that manage change and modernize business applications in the IBM i environment, announces an exclusive relationship with EMYDIS. Software management expert EMYDIS will sell and support ARCAD's Application Lifecycle Management solutions in Germany and Austria.

This new partnership, established in September 2007, has already resulted in a successful sale of the ARCAD software suites to Aerzener Maschinenfabrik GmbH. Aerzener Maschinenfabrik is the world's leading provider of customer-focused solutions in the field of rotary engines.

Aerzener Maschinenfabrik selected the software management solutions supplied by ARCAD, the European market leader, after intensive comparison with products from other suppliers in December 2007.

"In addition to our technical advantages, professional and comprehensive advice from our German reseller partner EMYDIS was an important factor in the company's selection of our products," says ARCAD CEO and Chairman Philippe Magne.

Aerzener Maschinenfabrik's decision was based on the following ARCAD technical advantages:

- ARCAD-Open Repository, with its application knowledge base, extensive cross-reference, and documentation management for IBM i and Open Systems applications (external, in-house, IBM i, Windows, UNIX, and Linux),
- ARCAD's superior and deeper Eclipse plug-in integration in WDS*c*, which offers optimal integration possibilities and flexibility,
- the ability to interface to Aerzener Maschinenfabrik's existing in-house help-desk solution based on Lotus Notes,
- enormous flexibility to customize software management rules for logistics software (transfer, installation, etc.), and
- the ability to support the management of in-house customizations to the SoftM financial application system.

## **About EMYDIS**

Experience is no substitute, except with even more experience. This rule also applies to Application Lifecycle Management (ALM) and quality assurance. With this mission, EMYDIS was established in 2007. The EMYDIS team has more than 17 years of project management and software management experience. EMYDIS has helped numerous companies optimize productivity and management of business processes.

EMYDIS works with a variety of technology providers, depending on the project. In the area of Application Lifecycle Management (ALM) for IBM i and Open Systems applications, its software partner is ARCAD, a global supplier of integrated ALM solutions.

## **About ARCAD Software Inc.**

Founded in 1992, ARCAD Software publishes and sells an integrated software suite that automates the software development process, manages change, and makes deployment of new versions of enterprise applications more reliable. Solutions range from incident and request management to impact analysis, version control, documentation, test automation, and multi-platform deployment. ARCAD's staff is based in France (Paris and Annecy) and the United States (Peterborough, NH).

All ARCAD Software solutions follow the IBM i Developer Roadmap, making them an integral part of the application modernization process, and ARCAD is among the top three suppliers of Application Lifecycle Management solutions in the IBM i world.
